

dcadec_init

ff_dcadsp_init

sub_qmf32_float_c

```
graph LR; A[dcadec_init] --> B[ff_dcadsp_init]; B --> C[sub_qmf32_float_c];
```

The diagram illustrates a sequential flow of three initialization functions. It begins with 'dcadec_init', followed by 'ff_dcadsp_init', and concludes with 'sub_qmf32_float_c'. Each function is contained within a rectangular box. The first two boxes are white with black borders, while the final box is shaded gray with a black border. Blue arrows connect the boxes from left to right, indicating the order of execution.
