

amr_wb_encode_frame

amr_wb_encode_init

get_wb_bitrate_mode

```
graph LR; A[amr_wb_encode_frame] --> C[get_wb_bitrate_mode]; B[amr_wb_encode_init] --> C;
```

The diagram illustrates a dependency relationship. On the left, two white rectangular boxes are stacked vertically. The top box contains the text 'amr_wb_encode_frame' and the bottom box contains 'amr_wb_encode_init'. On the right, there is a single gray rectangular box containing the text 'get_wb_bitrate_mode'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both 'amr_wb_encode_frame' and 'amr_wb_encode_init' depend on 'get_wb_bitrate_mode'.
