

decode_init

ff_proresdsp_init

prores_idct_put_12_c

```
graph LR; A[decode_init] --> B[ff_proresdsp_init]; B --> C[prores_idct_put_12_c];
```

The diagram illustrates a three-step process flow. It begins with a box labeled 'decode_init', followed by an arrow pointing to a box labeled 'ff_proresdsp_init', and finally an arrow pointing to a box labeled 'prores_idct_put_12_c'. The final box is shaded gray, indicating it is the current or final step in the sequence.
