

E:/github/ffmpeg/libavfilter
/dnn/dnn_backend_native_layers.h

```
graph BT; A["E:/github/ffmpeg/libavfilter/dnn/dnn_backend_native_layers.c"] --> C["E:/github/ffmpeg/libavfilter/dnn/dnn_backend_native_layers.h"]; B["E:/github/ffmpeg/libavfilter/dnn/dnn_backend_native_layers.c"] --> C;
```

The diagram illustrates a dependency relationship in a code project. At the top, a gray-shaded box represents a header file: `E:/github/ffmpeg/libavfilter/dnn/dnn_backend_native_layers.h`. Below it, two white boxes represent source files: `E:/github/ffmpeg/libavfilter/dnn/dnn_backend_native_layers.c` on the left and `E:/github/ffmpeg/libavfilter/dnn/dnn_backend_native_layers.c` on the right. Two blue arrows point from the top-right corner of the left source file box and the top-left corner of the right source file box towards the bottom edge of the header file box, indicating that both source files include or depend on this header.
