

decode

```
graph LR; decode[decode] --> bs2gl[bytestream2_get_bytes_left];
```

A diagram showing a call to the `decode` function. The `decode` function is represented by a gray rectangular box on the left. A dark blue arrow points from the right side of this box to the right side of a white rectangular box on the right. This white box contains the text `bytestream2_get_bytes_left`, which represents the function being called.
