

float_near_ulp_array

```
graph LR; A[float_near_ulp_array] --> B[float_near_ulp]; B --> C[is_negative];
```

A flowchart with three rectangular boxes connected by arrows. The first box, labeled 'float_near_ulp_array', is shaded gray. A blue arrow points from its right side to the second box, labeled 'float_near_ulp', which is white. Another blue arrow points from the right side of the second box to the third box, labeled 'is_negative', which is also white. All boxes have a black border.
