

postProcess

```
graph LR; A[postProcess] --> B[transpose_8x16_char_fromPackedAlign_altivec]
```

A diagram showing a call from a function named 'postProcess' to another function named 'transpose\_8x16\_char\_fromPackedAlign\_altivec'. The 'postProcess' box is white with a black border, and the target function box is gray with a black border. A blue arrow points from the right side of the 'postProcess' box to the left side of the target function box.
