

adts_aac_read_header

adts_aac_read_packet

adts_aac_resync

```
graph LR; A[adts_aac_read_header] --> C[adts_aac_resync]; B[adts_aac_read_packet] --> C;
```

The diagram illustrates a control flow where two functions, `adts_aac_read_header` and `adts_aac_read_packet`, both point to a single function, `adts_aac_resync`. The arrows indicate that both functions trigger or lead to the execution of `adts_aac_resync`.
